# BACTERIA, NO MORE. CASA KEEPS WATER PURE.

Introducing Casapure, an Antibacterial Water Tank in attractive new colours.

## RANGE & SPECIFICATION

Capacity (litres)	Dia. (Inches)	Height (Inches)	Manhole Dia. (Inches)
500	35.80	38.00	15.7
750	41.20	43.00	15.7
1000	44.40	49.00	15.7
1500	50.40	57.20	15.7
2000	56.40	61.20	15.7

## The Threat

The longer water is stored in tanks, the greater the threat of contamination from bacteria.

Moreover, certain temperatures inside water tanks cause microbes to rapidly multiply.

This affects the quality of water stored and also leads to malodour, discolouration and algae formation in tanks.

## The Solution

To meet this threat, Casapure developed Casapure, an antibacterial water tank.

It effectively fights bacteria and microorganisms, resulting in more hygienic water that ensures better health for people.

It not only stores water safely, but also guarantees algae prevention and a 99% reduction in bacteria inside the tank.
